

Constructed Sentences

Take each set of five words and turn them into **THREE** complete, grammatically correct sentences. Write a brief paragraph explaining how the words function in each constructed sentence.

Sample Words				
chair	pen	printer	purse	will

Sample Sentence:

I **will** set the **printer** on the **chair** and get the **pen** out of my **purse**.

Sample Analysis:

“Will” works together with the verb, “set,” to form an action. “Printer” is the object of that action, which is performed by “I.” “Chair” is now part of a phrase—“upon the chair”—that tells where the action of setting occurs. “And” introduces a second action that parallels the first action in the sentence. “Pen” is the object of “get,” and the phrase “out of my purse” identifies where the pen will be gotten from.

Write a new set of **THREE** constructed sentences and analyses each day using the following word sets:

Day One	Day Two	Day Three	Day Four	Day Five
coffee	banana	even	dog	can
book	never	giraffe	fall	computer
set	run	laugh	ice	cool
slowly	stand	may	quiz	cough
table	swing	strike	soon	crazy
